

# Intelligent Software Solutions For Mission Critical System

At CohesionForce, we leverage over twenty years of experience and engineering talent to help our partners modernize and sustain weapon system superiority for U.S. warfighters and their allies.

CohesionForce, Inc. is a respected Veteran Owned Small Business (VOSB), and a Scaled Agile Bronze Transformation Partner, specializing in advanced software engineering for the defense industry.

Since 1998, we have acquired a deep domain knowledge of **software engineering technology and services** that includes:

- Command & Control (C2) Systems
- Missile Defense Systems
- Modeling and Simulation Frameworks
- Legacy System Modernization

With a user centric approach and advanced engineering, we apply Model Driven Architecture (MDA) and Model Driven Development (MDD) to design and develop intelligent software solutions for complex, mission critical systems.

## Core Competencies

A consistent set of core competencies underpin the basis of our work developing and sustaining advanced software solutions, namely:

- Systems and Software Engineering,
- Software Test and Evaluation,
- Configuration and Data Management,
- Process and Project Management,
- Learning and Training,
- Software Assurance,
- Human Capital Management,
- Research and Development

## Our R&D Focus

- Practical Application of Open Source Technologies
- Model Driven Architecture
- Natural Language Processing
- Modeling and Simulation
- Data Management & Visualization
- Knowledge Management

— We —  
**Believe**

Engineering with Discipline Should Be Easy  
Systems Should Be Fulfilling to Use  
Better Systems Are Needed to Solve the Problems of Tomorrow
